To: Andy Gingrich andy@proactiveindustrial.ca

Hi Andy,

The Masteel MBHSA-12280 CNC Synchronized Hydraulic Press Brake quoted to you from stock at our Delta factory is the MBHSA-12280 CNC Synchronized Hydraulic Press Brake (for high end large screen control and programmable Z-axis).

So we'll change the control on this stock machine to the standard quoted Siemens control and remove the Z-axis to make it the standard quoted MBHSA-12280 model.

Attached is the manual for the plate bending rolls which shows you the cone bending on pages 7.4, 7.5 and 7.6. I will publish this manual on [your Masteel project page](#).

As pricing and availability of the quoted stock machines is subject to prior sale - with one other customer currently considering purchasing the quoted press brake - i put a hold on the following stock machine package for you with the right of first refusal:

| | |
|---|----------------------|
| Masteel MBHSA-1280 press brake as per quote dated 2021-2-11: | Cdn. \$108,732 |
| Masteel LHF-1006E plate bending rolls as per quote 2021-2-11: | <u>Cdn. \$39,900</u> |
| Sub Total: | Cdn. \$148,632 |
| 5% dual machine order discount: | <u>Cdn. \$7,432</u> |
| Sub Balance: | Cdn. \$141,200 |
| 13% H.S.T. | <u>Cdn. \$18,356</u> |
| Balance: | Cdn. \$159,556 |

As per the payment terms on the above quotes.

Many thanks,

Ron Nater
