double column vertical + 5-face machining centres

vision

Masteel's vision is guided by its principal of supplying and servicing the highest metalworking technology value for its customer's investment to best-fit its metalworking application(s) - while helping its client to increase its business profitability and longevity with this technology.

history

For nearly 20 years, Masteel has been supplying the North American market with quality CNC machining and fabricating equipment at affordable prices. Focusing on sales and customer service Masteel operates from offices in Vancouver / British Columbia, Edmonton / Alberta and Toronto / Ontario, with inventory and full service support available from each location.

Masteel CNC press brakes and shears are built with North American-made quality components, including U.S. made motors and pumps and standard North American hydraulics and fittings, at the Canadian Masteel facilities in Vancouver, British Columbia. Service parts for Masteel fabricating equipment are locally available - offering customers less down time and lower cost supply - as direct factory service from Masteel ensures reliable technical support for local business.

Masteel America Corp is a Canadian based company strengthened by an international group of companies involved in metalworking machine engineering / manufacturing / sales / service and property development. The company is proud of its 20-year history in Canada and is committed to providing exceptional quality and unmatched value to its customers.

customer support

Masteel sales support

Masteel's sales support team includes senior consultants who have been around the industry for 40 years or more - as the team members have worked with the world's leading metalworking technology manufacturers covering a wide variety of metalworking applications. This unmatched metalworking technology experience allows the Masteel sales team to discuss and recommend a most cost-effective need-solution when visiting its customer's shop/plant.

Masteel technical support

Every Masteel customer is supported by Masteel's team of direct Masteel and subcontracted application + service technicians for CNC machine installation, Fagor conversational turning + machining programming training, Masteel CNC press brake and shear programming training, all CNC machine operator training and timely attendance to any unforeseen failures and/or corrections during and after the warranty period of any Masteel supplied machine.
