

offers true 10-axis small part multi-tasking turning / machining up to 60mm bar diameter

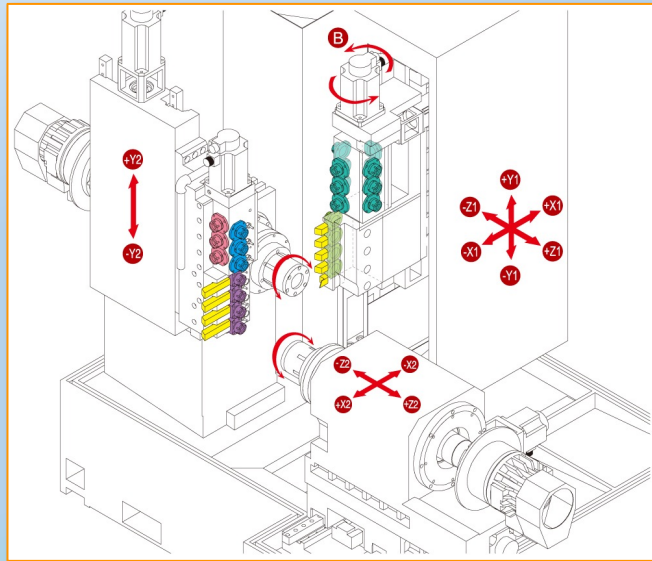

with the most productive / accurate / cost-effective turning / machining technology

- * high production/high accuracy left/right gang tooling to eliminate turret indexing
- * simultaneous left + right spindle turning operation
- * simultaneous left + right C-axis spindle machining operation
- * simultaneous left + right spindle Y-axis machining operation
- * left + right spindle 12 station 360° B-axis any-angle machining operation

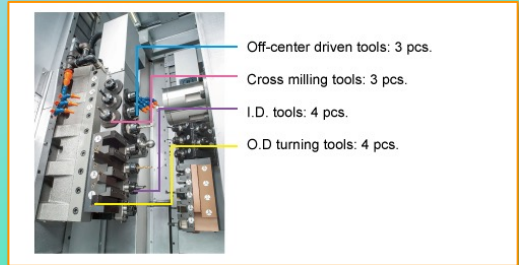

POLY GIM

tooling system for the main spindle
(sharing 360° B-axis with sub-spindle operation)

X1, Y1, Z1, C1, X2, Y2, Z2, C2, B + A-axis

tooling system for the sub-spindle
